

Using FIND

You can use the FIND feature on your device to find any sequence of letters on a webpage.

General Directions:

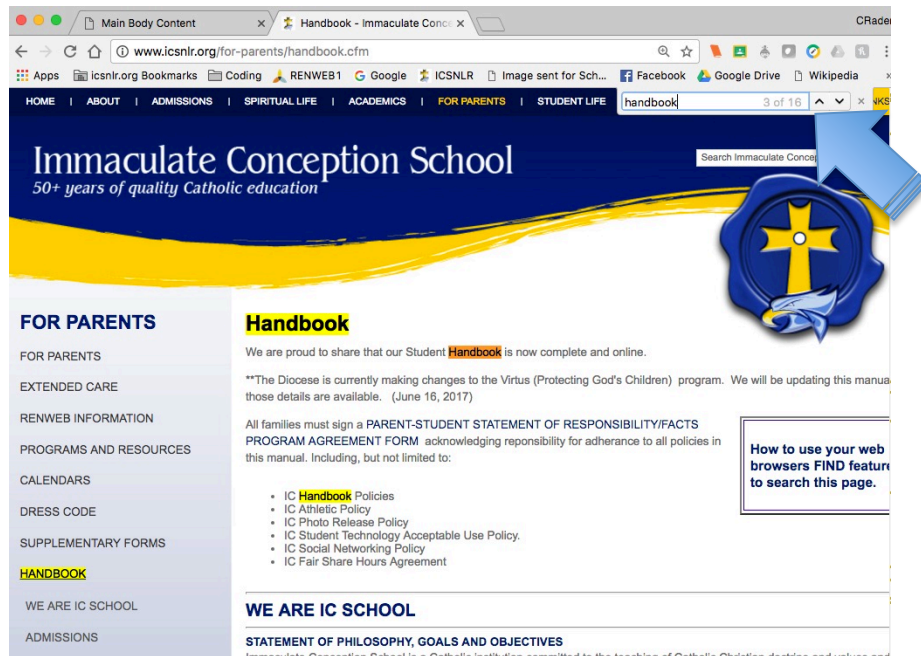

Open the page you want to search

On most web browsers: Ctrl+F (Windows) or Command+F (Mac)

Type in the word you are searching for

The browser will instantly highlight the word

If more than one is found you will see arrows that will move you to the next instance of that word.

iPhone:

Find in Page

Safari has a Find in Page feature, although it's a bit hidden. To perform a search for words on the current page, tap the address bar and type your search. Tap the Find option under On This Page at the bottom of the list to search the current page. If you don't see this option, scroll down — it may be obscured by the on-screen keyboard.
